The Ultimate Cleavage Make-Over

Application & Removal

If roller ball sticks, run under warm water until movable. Keep roller ball clean after each use to prevent ball from sticking. Close cap tightly.

Apply

Boob Glue® will set fast, so work quickly to position your breasts exactly where you want them.

*Won't stain fabric. We recommend testing fabric just to be safe.

Step 1: Make sure area to be applied is clean and dry, free from any oils, lotions or powders.

Step 2: With garment on, remove one breast at a time. Holding center of breast, roll on Boob Glue® liberally and thoroughly around the entire breast area that is to be placed in garment, avoiding nipple area.

Step 3: Arrange breasts to desired position in garment. Hold garment in place and press firmly for 1 minute. Remove residual on skin or garment with a damp cloth.

Practice makes perfect!

Remove:

Slowly remove garment from skin against gravity. Boob Glue® rinses off easily with soap and water. Moisturize as usual. Launder as usual.

Re-wearing garment with multiple layers of Boob Glue® without laundering may cause too firm a hold on breasts causing skin to become sensitive upon removal.

Avoid use if skin is sensitive to alcohol.

Do not use on cut, sore, burned, damaged, sun damaged or disordered skin.

It's always best to test on a small area before using.

See product label for precautions.

Uplifting Hints

To Minimize Cleavage (Lift and Separate)
Position breasts up and apart.

To Maximize Cleavage (Lift and Add Fullness)
Position breasts upward and in.

Eliminate Armpit Bulge
Tuck away under the arm "spillage" into sides of garment or bra.

Eliminate Cup Spillage
Position and secure breast skin inside center perimeter of bra for a smooth flawless look.

Smooth Décolleté Lines or Stretch Marks
Positioning and securing breasts up and apart will smooth creases and lines.
